Burdock root

Burdock root has the ability to purify blood and cool internal heat. Internally and externally, it has potent anti-inflammatory and antibacterial effects on the human body. Burdock contains phenolic acids, quercetin and luteolin, which are all powerful, health-promoting antioxidants. Burdock root has active ingredients that have been found to detoxify heavy metals from the blood, improving organ health and the health of the whole body. It also promotes blood circulation to the skin surface, which improves skin health. Burdock root helps induce lymphatic drainage and detoxification. As a natural blood cleanser, it has a wonderful effect on the lymphatic system. Burdock act as a Diuretic to stimulate the kidneys and help the body get rid of excess fluid, mainly water and sodium. Consumption of burdock has also helped many people with skin issues like acne to eczema to psoriasis through its blood-cleansing and internal cooling abilities. Burdock root contains insulin, a soluble and prebiotic fiber that helps improve digestion and lower blood sugar, making it an excellent choice for people trying to naturally manage their blood sugar especially diabetic retinopathy. burdock root can stop cancer cells from metastasizing, making it a pH, creating a less favorable environment for kidney stone formation. They primarily prevent anemia by improving your absorption of iron from plant foods.
